

Windows 10 File Explorer

File Explorer allows you to browse, search, and manage files and folders on your PC. You can also use it to access files and folders on other devices, such as OneDrive, Downloads, Desktop, Recycle Bin, etc.

There are two ways to open File Explorer:

1. Click on the taskbar icon. To bring up the taskbar, press the Windows logo key + E.

2. Access it from the Start menu. To bring up the Start menu, press the Windows logo key + X.
